# Generations and Gender Survey Lithuania Wave 1 & Wave 2 (GGS Lithuania Wave 1 & Wave 2)

*Kartu ir lygiu tyrimas*

Overview	
<b>Identification</b>	GGS.W1.W2.25
<p><b>Abstract</b></p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul>	
<b>Kind of Data</b>	Survey data
<b>Unit of Analysis</b>	Individuals

Scope & Coverage	
<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<b>Time Period(s)</b>	2006-2009
<b>Countries</b>	Lithuania
<p><b>Geographic Coverage</b></p> <p>Whole territory of the Republic of Lithuania.</p>	
<p><b>Universe</b></p> <p>WAVE 1</p> <p>Target population: permanent residents of Lithuania aged 18-79 years.</p> <p>WAVE 2</p> <p>Persons who took part at Wave 1 and agreed to be re-contacted for Wave 2 (5810 persons, i.e., 58% of the 10,036 persons interviewed at Wave 1).</p> <ul style="list-style-type: none"> <li>- SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and are NOT included in the harmonised Wave 2 file.</li> </ul>

## Sampling

### Sampling Procedure

#### WAVE 1 SAMPLING PROCEDURE

##### 1. Sampling frame

1.1 Type of frame: List of geographic units and population as of 1 January 2006, Statistics Lithuania.

1.2 Frame coverage: Individuals residing in Lithuania aged 18-79 years, excluding institutionalised persons (prisons, army, hospitals, etc.).

1.3 Frame size: 2,557,085 individuals

1.4 Level of units available: Settlements and districts within urban areas.

##### 2. Sampling method

2.1 Sampling method type: Multistage random sample design had been used for the study. The first stage of the sampling procedure consists in defining administrative regions of Lithuania: 10 such regions are defined. In order to identify cluster of sampling, sampling points are selected according to the size of the settlements that are grouped into big, medium, small towns and villages. The number of the sampling points in each category depends on the percentage of population living in the settlements of this category.

##### 2.2 Sampling stage definition

- PSU: Administrative regions (counties).

- SSU: Settlements.

- TSU: Individuals aged 18-79.

##### 2.3 Sampling stage size

- PSU: 10.

- SSU: 318.

- TSU: 10,036.

##### 2.4 Unit selection: Systematic random.

##### 2.5 Final stage unit selection: SRS (Simple Random Sampling).

##### 2.6 Within Household unit selection: Last birthday method.

##### 2.7 Stratification: Implicit.

##### 2.8 Sample size

- Starting size sample: 912 PSU's ( $912 \times 11 = 10,032$ )

- Aimed total size at Wave 1: 10,036.

- Aimed total size at Wave 3: None.

##### 2.9 Estimated Non-response

- Initial non-response: Not estimated.

- Yearly attrition: Not estimated.

- Non response measures: Not applicable for random route methodology.

- Within household non-responses measures: Three call-backs were used in order to contact the household or eligible respondent. If after three call-backs there was no contact, no other measures were used and hence, the household was marked as non-response.

#### WAVE 2 SAMPLING PROCEDURE

Sampling: panel (wave 1 database of addresses). All the Wave 1 persons who had agreed to be recontacted for a second interview (i.e., 5810 respondents which is equal to 58 of Wave 1 respondents).

SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and they represent a new sample. This allowed to carry out 5748 additional completed interviews. These interviews are NOT included in the released harmonised Wave 2 file.

#### ESTIMATED NON-RESPONSE

- Initial non-response: 5810 respondents of the 1st wave agreed to be interviewed during the 2nd wave of GGS in 2009. After the 1st wave while collecting updated contact information about respondents we received following information:

272 respondents died/ were ill / not able to communicate;

449 respondents moved to other country;

691 respondents moved to other location, contact information not available;

443 respondents - no contact with them, no information about them available.

- Yearly attrition: None, the yearly attrition was not estimated

- Non response measures: Sending post cards after the fieldwork, Sending letters and address cards for checking the contact information in 2007 and 2008.

If no response received via ordinary mail, respondents were contacted via phone from address' data base. If telephone number was not available, interviewers visited addresses from data base and collected updated information. Respondents having e-mail addresses were sent e-mail letters with request for updated contact information.

- Within household non-responses measures: In wave 2, no specified number of visits in order to contact necessary person and conduct the interview. In ad hoc survey - three call-backs were used in order to contact the household or eligible respondent. If, after three call-backs there was no contact, no other measures were used - the household was marked as non-response

#### **Response Rate**

##### WAVE 1

Response rate - Final disposition codes:

I = complete interview: I = 10,036

P = partial interview: P = 0

NE = non-eligible : NE = 1,687

NC = non-contact : NC = 7,634

R = refusal: R = 7,685

O = other non-response: O = 2,842

UC = unknown eligibility, contacted: UC = DK

UC = unknown eligibility, non-contact: UC = DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC = DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN = DK

##### WAVE 2

Response rate - Final disposition codes:

I = Complete interview: I= Wave 2 - 2294 (total number of addresses used - 3176); In ad-hoc survey - 5748

P = Partial interview: P=0

NE = non-eligible: NE= Wave 2 - 0; In ad-hoc survey - 539"

NC = non-contact: NC= Wave 2 - 293 (total number of addresses used - 3176); In ad-hoc survey - 2427

R = refusal: R= Wave 2 - 376 (total number of addresses used - 3176); In ad-hoc survey - 2695

O = Other non-response: O= Wave 2 - 213 (total number of addresses used - 3176); In ad-hoc survey - 1147

UC = unknown eligibility, contacted: UC= dk

UC = unknown eligibility, non-contact: UC= dk

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC= dk

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN= dk

#### **Weighting**

##### WAVE 1

A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

##### WAVE 2

Wave 2 - no.

Ad hoc survey - yes. A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

## Data Collection

<b>Data Collection Dates</b>	Wave 1: start 2006-04-01 Wave 1: end 2006-12-30 Wave 2: start 2009-06 Wave 2: end 2009-12
<b>Data Collection Mode</b>	Method: Face-to-Face (personal interview). Technique: Paper and Pencil.

### Data Collection Notes

#### WAVE 1 DATA COLLECTION

##### 1. Interviewers

1.1 Total number of interviewers: 191.

1.2 Number of interviewers in the field: Each interviewer had to conduct particular number of interviews during specific period. Some of them could finish the work earlier than others.

1.3 Network organization: Field coordinators: field manager in central office; three regional supervisors in central office; four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other.

1.5 Payment of interviewers: Per interview.

##### 2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how to behave in possible complicated situations, how to speak with potential respondent, how to persuade him/her to take part in the survey, how to ask questions, etc.

2.2 Survey specific: All interviewers were instructed before GGS survey. First step of training was performed with regional supervisors. They were informed about the purpose of the survey and about the necessity strictly to follow requirements. Regional supervisors were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Regional supervisors were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make one interview each themselves and commented difficulties experienced. All their comments and difficult situations were discussed with project manager and field supervisor. Second step of training was performed by regional supervisors with interviewers in separate regions. The procedure was the same - they were informed about the purpose of the survey and about the necessity strictly to follow the requirements. Interviewers were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Interviewers were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make interview themselves and to comment difficulties experienced. All their comments and difficult situations were discussed with regional supervisor. Interviewers were trained in persuading the respondents to participate in next wave of the survey also. After training each interviewer was given one questionnaire and was asked to interview one person. These questionnaires were brought to regional supervisors and checked. If everything was done well, questionnaires were filled correctly, interviewers were allowed to conduct GGS survey interviews. If questionnaires were filled not correctly, interviewer either had to repeat training course, or he/she was not allowed to do interviews in this survey.

2.3 Length: Trainings - 8 full working days. Training contained both general interviewing questions and survey specific issues. Approximately one third of time was devoted to general interviewing and two thirds of time to survey specific issues.

2.4 Control of performance: After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet.

Next step - to check if interviewers chose necessary person for interview according to the birthday rule.

On the third step of quality control - all questionnaires were checked by supervisors: accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded. After the fieldwork finished, they were re-contacted by mail, phone or in-person and their data checked on a regular base.

2.5 Interviewer survey: No.

### 3. Contact protocols

3.1 Advance letter: No.

3.2 Cold contacts: Face-to-face.

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: Yes, in a regular contact sheet.

3.5 Min number of contacts: Number of interviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent).

2.6 Max number of contacts: Number of interviews that should be conducted in PSU was prescribed, not number of contacts.

### 4. Questionnaire localization

4.1 Validation: Yes, back-translation.

4.2 Pre-test: A pilot was carried out in March 2006 (150 respondents; 75 men + 75 women; 95 aged 18-49 + 55 aged 50-79; number of interviewers : 104; number of settlements: 67 ; mean length of the interview: 139 minutes, min 54 minutes, max 280 minutes, mode - 95 minutes, 25th percentile 105 minutes, median 130 minutes, 75th percentile 172 minutes). Major findings of the pilot: questionnaire is too long and too complicated. Two unacceptable themes: (1) possessions in household and inheritance, (2) partners and fertility (for older people). The majority of questionnaire adaptation was done in the Section 10 of the GGS Wave 1 Core questionnaire, namely some more general questions on the eagerness of respondent to answer the questions on possessions were added, while some questions were dropped (i.e. 1010-1018).

4.3 Length of interview: In the majority of cases respondents were co-operative. The average duration of interview was about 80 minutes depending on person interviewed - young or old, single or living with family, having several children or none, etc. In approximately one fifth of interviews other persons participated - children (most often small), parents or partner.

## WAVE 2 DATA COLLECTION

### 1. Interviewers

1.1 Total number of interviewers: 179

1.2 Number of interviewers in the field: 118 for wave 2 and 151 in ad-hoc of new respondents.

1.3 Network organization: Field coordinators: field manager in central office, three regional supervisors in central office, four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other

1.5 Payment of interviewers: Per interview

### 2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how behave in possible complicated situations, how to speak with potential respondent, how to persuade him to take part in the survey, how to ask questions, etc. Before the 2nd wave interviewers were instructed how to behave in situation if the person who agreed to participate in longitude refuses in the last moment.

2.2 Survey specific: same as for Wave 1

2.3 Length: same as for Wave 1

2.4 Control of performance: In wave 2, demographics of each completed interview was checked with demographics from personal card of the participant of the 1st wave.

Ad-hoc survey of new respondents : After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet. Next step – to check if interviewers chose necessary person for interview according to the birthday rule.

In wave 2 and in ad hoc survey all questionnaires were checked by supervisors - accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact the respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded.

2.5 Interviewer survey: None

### 3. Contact protocols

3.1 Advance letter: Respondents who agreed to participate in wave 2 were contacted several times during the period between 1st and 2nd waves - after first wave post card was sent with thank for participation. After that - 2 letters reminding about the second wave and with request to update contact information via ordinary mail. If no response received via ordinary mail respondents were contacted via phone or via e-mail or face-to-face.

In af hoc survey of new respondents - letter informing introducing GGS survey, the subject and the aim of the survey, the agency conducting interviews in Lithuania, the use of data in the future, etc. and asking potential respondents to take part in it.

3.2 Cold contacts: Face-to-face

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: In ad hoc survey - in a regular contact sheet

3.5 Min number of contacts: In wave 2 - no minimum number of contacts.

In ad hoc survey - number of interviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent)

2.6 Max number of contacts: In wave 2 - no maximum number of contacts.

In ad hoc survey - number of interviews that should be conducted in PSU was prescribed, not number of contacts

### 4. Questionnaire localization

4.1 Validation: back-translation

4.2 Pre-test: DK

4.3 Length of interview: DK

### **Questionnaires**

Structured questionnaire in Lithuanian and in Russian.

#### **Data Collector(s)**

Institute for Demographic Research, Lithuanian Social Research Centre (IDR LSRC)  
Baltic Surveys Ltd. (Gullop)

### **Supervision**

#### **WAVE 1 & WAVE 2 ACTIONS**

1. Dealing with nonresponse:

1.1 Screening: No.

1.2 Refusal conversion: Gallup (Baltic Surveys Ltd. is member of Gallup Inc.) has developed an Interviewers' Manual where possible complicated situations are described, most often asked questions by respondents and possible answers to them are listed. During interviewers' training this issue is usually widely discussed.

1.3 Incentives: No.

#### 2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details of the respondent were collected.

2.2 Other contact information: Yes, contact details of a proxy (such as parents, friend) were collected.

2.3 Cards: A "thank-you-letter" and a "change-of-address-notification" card (with paid postage fee, included in all the mailings as a standard part of the letter) were sent to all the respondents in 2007 and in 2008. If there were e-mail addresses given, "change-of-address-notification" messages were sent to these addresses also. If there was no postal information, respondents were called by phone or visited.

2.4 Additional surveys: No.

2.5 Administrative records: No.

## Data Processing & Appraisal

### Data Editing

#### WAVE 1 & WAVE 2 OPERATIONS

Consistency of all questionnaires was checked by supervisors first. In data entry process skip rules were used in order to avoid mistakes. When data was entered, data file was cleaned by detecting errors and correcting them.

### Access Conditions

In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.

### Citation Requirements

In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: Survey Instruments. New York and Geneva: UN, 2005

## Rights & Disclaimer

### Disclaimer

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

# Files Description

Dataset contains 1 file(s)

<b>GGG_Wave2_Lithuania_V1.3.</b>	
<b># Cases</b>	2292
<b># Variable(s)</b>	1184
<b>File Structure</b>	Type: relational Key(s): arid (R identification number (W2))
<p><b><u>File Content</u></b> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Version</u></b> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <ul style="list-style-type: none"> <li>- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.</li> <li>- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP,</li> </ul>	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.

- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.

- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.

- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (April 2014).

### **Processing Checks**

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Variables List

Dataset contains 1184 variable(s)

<b>Statistics [NW/ W]</b>	[Valid=2292 /-] [Invalid=0 /-]

<b>Definition</b>	Q 001
<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...
<b>Interviewer's instructions</b>	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent's or Respondent's partner's grandparent or great-grandparent is present in the Household grid (code 12); "No" otherwise.

## File : GGS\_Wave2\_Lithuania\_V1.3.

### # bcoresgrandp: Respondent has coresident grandparent or great-grandparent (W2)

Value	Label	Cases	Percentage
1	Yes	8	0.3%
2	No	2284	99.7%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # bcoressibl: Respondent has coresident sibling (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*/6]
<b>Statistics [NW/ W]</b>	[Valid=2292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent's or Respondent's partner's sibling is present in the Household (codes 13, 14); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	74	3.2%
2	No	2218	96.8%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # bhhtype: Household type Respondent (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-96] [Missing=*/96]
<b>Statistics [NW/ W]</b>	[Valid=2292 /-] [Invalid=0 /-]
<b>Definition</b>	Consolidated variable.
<b>Notes</b>	Generated from household grid (variables bhg3_*). Respondents' households were classified into groups according to the criteria explicated below. 1 "living alone": If the HH grid contains only R (hhsz=1). 2 "single parent": If HH grid contains R, at least one child (codes 2-6), and no parent. 3 "living with parents": If HH grid contains R, at least one parent (codes 7, 8), and no child. 4 "single parent living with parents": If HH grid contains R, at least one child and one parent, but no partner. 5 "couple with no children": If HH grid contains R, his/her partner (code 1); no child, nor parent. 6 "couple with children": If HH grid contains R, his/her partner, at least one child, and no parent. 7 "couple with parents": If HH grid contains R, his/her partner, at least one parent, and no child. 8 "couple with parents and children": If HH grid contains R, his/her partner, at least one parent and one child. 9 "other types" HH types different from 1-8, that may include codes 9-17 on bhg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	490	21.4%
2	single parent	190	8.3%
3	living with parents	148	6.5%
4	single parent living with parents	28	1.2%
5	couple with no children	565	24.7%
6	couple with children	782	34.1%
7	couple with parents	20	0.9%
8	couple with parents and children	47	2.1%

# bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=121 /-] [Invalid=2171 /-] [Mean=127.19 /-] [StdDev=89.583 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		

# **# bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)**

**Notes** Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871\_\*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years\*12) values have been put as equal to this difference.

### # bndurhelpfamstatuses: Total duration (in month) of Rs working statuses as helping family member in a f (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-677] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=129 /-] [Invalid=2163 /-] [Mean=56.86 /-] [StdDev=72.199 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16 (code 4 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)			
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servic (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=491 /-] [Invalid=1801 /-] [Mean=27.436 /-] [StdDev=13.371 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).			
Notes	Total duration (in month) of Rs other working statuses since age 16 (code 12 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b>Literal question</b>	In what month and year was the youngest of your grandchildren born?		
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of youngest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# # b303cAgeP: Partner's age of obtaining permanent residence (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=70 /-] [Invalid=2222 /-]
<b>Definition</b>	Derived variable from Q 322.c
<b>Universe</b>	If R lives with a partner who is not the same as Wave 1
<b>Literal question</b>	In what month and year did he/she first start living permanently in [country]?
<b>Notes</b>	Partner's time of birth was deducted from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Information	[Type= discrete] [Format=numeric] [Range= 10-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=47 /-] [Invalid=2245 /-]		
Definition	Derived variable from Q 330.		
Universe	If R has a non-resident partner (code 1 on Q 325).		
Literal question	In what month and year was your partner/spouse born?		
Notes	Partner's time of birth was taken from b315y and b315m. If information on partner's month of birth / month was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b914AgeP: Partner's age of becoming a homemaker (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=34 /-] [Invalid=2258 /-]		
Definition	Derived variable from Q 1014		
Universe	If code 8 on Q 1001		
Literal question	Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month of becoming a homemaker was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b920: Is partner in paid work in the 7 days ending last Sunday (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=575 /-] [Invalid=1717 /-]		
Definition	Q 1020		
Universe	R in partnered and partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service OR if code 12 on 1001		
Literal question	Did your partner/spouse do any paid work in the 7 days ending last Sunday, either as an employee or self-employed?		
Value	Label	Cases	Percentage
1	yes	14	2.4%
2	no	561	97.6%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	43	
Sysmiss		1674	
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.			
# b921: Partner's current occupation (see code ISCO) (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 1-9993] [Missing=*/9997/9998/9999]		
Statistics [NW/ W]	[Valid=879 /-] [Invalid=1413 /-]		
Definition	Q 1021		

# b921: Partner's current occupation (see code ISCO) (W2)			
Universe		If code 2, 3, 4 on Q 1001 OR code 1 on Q 1020	
Pre-question		I would now like to ask a few questions about your partner's/spouse's current job or business. If he/she is engaged in two or more jobs or businesses, I would like you to tell me now only about the one in which he/she spends most of his/her working hours.	
Literal question		What is your partner's/spouse's current occupation? Please describe the principal activity he/she performs.

# b1008u: Time unit of income (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 1-1802] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=1680 /-] [Invalid=612 /-]		
Definition	Q 1108		
Literal question	If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.		
Post-question	Write in. If R gave the answer per month, probe: Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.
