## Generations and Gender Survey Belgium Wave 1 (GGS Belgium Wave 1)

### Overview

<b>Identification</b>	GGSW1.23
<b>Abstract</b>	<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul>
<b>Kind of Data</b>	Survey data
<b>Unit of Analysis</b>	Individuals

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<b>Time Period(s)</b>	2008-2010
<b>Countries</b>	Belgium
<b>Geographic Coverage</b>	Whole national territory of the Kingdom of Belgium.
<b>Universe</b>	The data cover the non-institutionalized population aged 18-79, officially residing on Belgian territory as of January 2008, 1, regardless of the spoken language(s).

## Sampling

### Sampling Procedure

1. Sampling frame: The total Belgian population was equal to 10,666,866 individuals (source: STATBEL), as of 1 January 2008 when the sample was drawn; the survey population was equal to 7,828,470 persons at that moment. This is 73% of the total Belgian population at that moment.

2. Sampling method: On the one hand, a random sample, i.e. a stratified two-stage sample using the National Register as basis; 17,836 people in total were selected this way. On the other hand, corrections were implemented through weighting factors, after analysis of the non-response (at interview as well as at item level).

### Response Rate

Response rate - Final disposition codes:

I or P = complete interview or partial interview= 7171

NE = non-eligible: 663

NC = non-contact: 945

R = refusal: 5689

O = other non-response: There have been 589 broken appointments; 1373 were impossible, and 1406 not attempted.

## Data Collection

<b>Data Collection Dates</b>	start 2008-02 end 2010-05
<b>Data Collection Mode</b>	Method: Face-to-Face (personal interview). Technique: Computer-Assisted (CAPI).

### Data Collection Notes

#### 1. Interviewers

- Interviewer training: Interviewers were informed about general basic rules of interviewing. During the training, the following topics were dealt with: contacting procedure, confidentiality issues, before interview protocols (including techniques to persuade contacts to participate to the survey), interviewing method and best practices. Interviewers were also provided with relevant documentation concerning the survey.

- Control of performance: To monitor the work of interviewers during the fieldwork, a follow-up was organized on a weekly basis, through the so-called "group monitor". In case of doubt about the work and the good intentions of the interviewer, he/she could be asked to give his/her group to another interviewer.

#### 2. Contact protocols

2.1 Advance letter: No. Interviewers could announce their visit by a letter. But this was not compulsory.

2.2 Cold contacts: Face-to-Face

2.3 Scheduling / scattering: Yes. To get the highest response rate, contacts attempts were scattered over different days of the week and different parts of the day.

2.4 Contact history: Yes. For each contact attempt, the interviewer had to report the date, the time and the outcome in a contact form.

2.5 Min number of contacts: 3 (at least one time at the individual's home, at least one time in the evening and one in the weekend).

2.6 Max number of contacts: 10.

### 3. Questionnaire localization

- Pre-test: a pilot study was carried out in June 2007, on a random sample of N=1000. However, only 107 individuals accepted to participate and, of them, only 72 were actually interviewed. As a result, the pilot was really biased in terms of age and education profiles. This experience suggested asking respondent with an informed consent form.

- Length of interviews: median duration equal to 69 minutes.

The optional modules on "Housing" and "Nationality & Ethnicity" were only partially implemented in Belgium. The "Housing" module overlaps with the Belgian censuses that are carried out since 2001. In order to make the GGS international questionnaire compliant with the Belgian National Law, some questions have been modified/omitted. Some response categories have been modified. Once translated in French, Dutch and German, the questionnaire was not re-translated back in English.

### **Questionnaires**

Structured questionnaire available in Dutch, French.

<b>Data Collector(s)</b>	Statistics Belgium (fieldwork from February 2008 to April 2009) TNS Dimarso (fieldwork from November 2009 to May 2010)

### **Access Conditions**

In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.

### **Citation Requirements**

In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: Survey Instruments. New York and Geneva: UN, 2005

### **Rights & Disclaimer**

#### **Disclaimer**

The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

# Files Description

Dataset contains 1 file(s)

GGs_Wave1_Belgium_V.4.3.	
# Cases	7163
# Variable(s)	1595
<p><b><u>File Content</u></b></p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Version</u></b></p> <p>Harmonized dataset, GGS Wave1, version 4.3.</p> <p>IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):</p> <p>Variables corrected with Version 4.3.</p> <ul style="list-style-type: none"> <li>- fertintent (no more ambiguous labelling)</li> <li>- a1101 (corrected error in coding)</li> <li>- aweight (now available also for NLD CZE SWE POL)</li> <li>- aregion (now available also for HUN)</li> <li>- aplace (now available also for HUN)</li> <li>- a5112 (corrected routing error for ROU)</li> <li>- a5113 (corrected routing error for ROU)</li> <li>- a5114 (corrected routing error for ROU)</li> <li>- a5115 (corrected routing error i for ROU)</li> <li>- a211b_ (corrected error for POL &amp; GEO)</li> <li>- ankids (corrected error for POL &amp; GEO)</li> <li>- a1008mnth (corrected error for NGR &amp; BEL)</li> <li>- a108 (now available for SWE)</li> <li>- a109_1 (now available for SWE)</li> <li>- a109_2 (now available for SWE)</li> <li>- a149 (now available for SWE)</li> <li>- a309 (now available for SWE)</li> <li>- aregion (now available for SWE)</li> <li>- a620_ (corrected error for DEU &amp; CZE)</li> </ul>	

- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

#### IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild corespren coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324\_hour a520\_hour a540\_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c\_?w a204c\_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828\_1dig a832\_1dig a861\_1dig a917\_1dig a921\_1dig a933\_1dig a5112\_1dig a5114\_1dig.

#### IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat ankids a540t a866\* a929\* a940ff.

#### IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhsize ahhsize ahhsize.

- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.

- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a944, a945.

- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627\*, a628\*, a629\*, a631\*, a383 (now rounded), a864\*ff, a936\*, a334m\*.

- Variables for which labels are now corrected: a1101\_2301, a1104\*, a351\*, a312b, a203b\* ("family, neighbors, friends (paid) as cs value" was dropped because this refers to informal childcare captured in a204b\*).

#### FIRST DATASET RELEASED: V. 3.0 (December 2011).

#### **Processing Checks**

##### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted

according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...

<b>Interviewer's instructions</b>	Interviewer Instruction: Read the following text. This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold

### # fertintent: if partnered: fertility intentions of the couple

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=2803 /-] [Invalid=4360 /-]
<b>Definition</b>	Derived variable
<b>Literal question</b>	<p>Do you yourself want to have a/another baby now?</p> <p>Couples do not always have the same feelings about the number or timing of children. Does your partner/spouse want to have a/another baby now?</p>
<b>Notes</b>	<p>The four codes were obtained from questions 611 and 615 in the obvious way (variables a611 and a615).</p> <p>Note that this variable does not have a value if either Respondent or Respondent's partner answered "Not sure" (code 3).</p>

## File : GGS\_Wave1\_Belgium\_V.4.3.

### # fertintent: if partnered: fertility intentions of the couple

Value	Label	Cases	Percentage
1	Both intend to have a child	287	10.2%
2	Partner wants to have a child, respondent doesn't	159	5.7%
3	Respondent wants to have a child, partner doesn't	79	2.8%
4	Both don't intend to have a child	2278	81.3%
Sysmiss		4360	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # numbiol: Total number of biological children

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=7163 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Literal question</b>	The number of biological children of the respondent (with the current or with former partner).
<b>Notes</b>	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3_*); for non-resident children, copied from question a213 (code 1 on variable a213_*). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		2367	33.0%
1		1416	19.8%
2		2051	28.6%
3		866	12.1%

Definition	Derived variable from Q 107 core questionnaire		
Universe	If code 2 on Q 105		
Literal question	In what month and year did you first start living permanently in [country]?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"</p> <p>Data is not available for Estonia.</p>

# a121AgeR: R's age of starting to live in current dwelling	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=6704 /-] [Invalid=459 /-]
<b>Definition</b>	Derived variable from Q 115 core questionnaire
<b>Literal question</b>	In what month and year did you start living in this [type of accommodation]?
<b>Notes</b>	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".</p> <p>Data is not available for Estonia.</p>

# a302bTdiff: Time elapsed between start of living together and marriage (years)			
Information	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=3542 /-] [Invalid=3621 /-]		
Definition	Derived variable from Q 302.b core questionnaire		
Universe	If code 1 on question 302.a		
Literal question	In what month and year did you marry?		
Notes	The time of starting to live together was deducted from the answer to Q 301. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.

# a303cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=460 /-] [Invalid=6703 /-]		
Definition	Derived variable from Q 303.c core questionnaire		
Universe	If code 2 on Q 303.a		
Literal question	In what month and year did he/she first start living permanently in [country]?		
Notes	Partner's time of birth was either deduced from HH grid. If information on partner's month of birth / month when partner started living permanently in country was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a310: Have relationship to somebody without cohabitation			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=2267 /-] [Invalid=4896 /-]		
Definition	Q 306 core questionnaire		
Universe	If R does NOT have a co-resident partner		
Literal question	Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.		

## # a310: Have relationship to somebody without cohabitation

Value	Label	Cases	Percentage
1	yes	686	30.3%
2	no	1581	69.7%
7	does not know	0	
8	refusal	0	
9	no response/not applicable	14

## # a311AgeR: R's age at start of current relationship

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 10-72] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=648 /-] [Invalid=6515 /-]
<b>Definition</b>	Derived variable from Q 307 core questionnaire
<b>Universe</b>	If R has a non-resident partner (code 1 on Q 306)
<b>Literal question</b>	In what month and year did this relationship start?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a316cAgeP: Partner's age at start of permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 10-34] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=31 /-] [Invalid=7132 /-]		
Definition	Derived variable from Q 312.c core questionnaire		
Universe	If code 2 on Q 312.a		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a331_d: Who think you should start living together: Other relatives			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=1979 /-] [Invalid=5184 /-]		
Definition	Q 323.d core questionnaire		
Universe	If R is currently NOT living with a partner		
Pre-question	Although you may feel that the decision to start living together with a partner is yours (and your partner's), it is likely that others have opinions about what you should do. I'm going to read out some statements about what other people might think about you starting to live with a/your partner during the next three years. Please tell me to what extent you agree or disagree with these statements, choosing your answer from this card. Card 323: Agreement Scale		
Literal question	Most of your other relatives think that you should start living together with a/your partner		
Value	Label	Cases	Percentage
1	strongly agree	172	<div><div></div></div> 8.7%
2	agree	237	<div><div></div></div> 12.0%

# a332: Intention to marry during next 3 yrs			
Information	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9]		
Statistics [NW/ W]	[Valid=650 /-] [Invalid=6513 /-]		
Definition	Q 324 core questionnaire  - HUN: one additional value "1601-not". - NOR: only country specific values "2001-no", "2002-yes".		

# a332: Intention to marry during next 3 yrs			
	- BEL: filter is different. Due to filter misspecification during data collection this question has only been asked to respondents who are not currently married and have a NON-resident partner. - EST: filter is different. This question has only been asked to respondents who have a co-resident partner to whom they are not married. - POL: error in data collection, only respondents with a co-resident partner to whom they are not married are asked about marital intentions (no lat partnerships!).		
<b>Universe</b>	If R is currently NOT married		
<b>Literal question</b>	Do you intend to marry somebody/ your partner during the next 3 years?

# a374cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=491 /-] [Invalid=6672 /-]		
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).		
Universe	If R's partner not born in [country]		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# # a621AgeP: Partner's age at last use of anything to prevent pregnancy

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 14-55] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=186 /-] [Invalid=6977 /-]
<b>Definition</b>	Derived variable from Q 621 core questionnaire
<b>Universe</b>	If code 0 on Q 620
<b>Literal question</b>	In what month and year did you last use or do anything to prevent pregnancy?
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at last use of anything to prevent pregnancy was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

<b>Universe</b>	If code 8 on Q 901		
<b>Literal question</b>	Since what month and year is your partner/spouse a homemaker?		
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month of becoming a homemaker was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a941AgeP: Partner's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1444 /-] [Invalid=5719 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.

# a1008mnth: Average monthly net income of all HH members (last 12 months)			
Information	[Type= discrete] [Format=numeric] [Range= 0-10225] [Missing=*/99999997/99999998/99999999]		
Statistics [NW/ W]	[Valid=4609 /-] [Invalid=2554 /-]		
Definition	Derived variable from Q 1008 core questionnaire		
Literal question	If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.		
Post-question	Write in. If R gave the answer per month, probe: Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.		
Notes	Frequencies per year were converted to frequency per month. Values have been rounded to 1/10; values exceeding 1 have been rounded to the nearest integer.
